
 Excited to kickstart my journey towards becoming a better Senior Developer! 

Target Role: L4-L6 level

Target Salary: \$60k-\$90k

Target Period: 6-12 months

Learning Plan:

- **Chapter 1: DSA (Data Structures and Algorithms)**

- **Goal:** Master all medium-level LeetCode questions + brute force version of hard questions.

- **Chapter 2: Languages/Compiler**

- **Goal:** Deep understanding of at least 2 programming languages.

- **Chapter 3: Databases**

- **Goal:** Deep understanding of SQL, No-SQL, Time-series, and Graph databases, including data warehousing, big data, and distributed databases.

- **Chapter 4: Networking**

- **Goal:** Understanding of networking protocols and web application architecture.

- **Chapter 5: Distributed Systems**

- **Goal:** Understanding of distributed system architectures.

- **Chapter 6: Cloud Services**

- **Goal:** Proficiency in utilizing cloud services.

- **Chapter 7: Data-intensive apps**

- **Goal:** Understanding how to develop data-intensive applications.

- **Chapter 8: High-level design**

- **Goal:** Proficiency in high-level system design.

- **Chapter 9: Low-level design**

- **Goal:** Proficiency in low-level system design.

Who's with me on this journey? Let's level up together!
